SUMMARY

Experienced **Cloud & DevOps Consultant, Product Manager, and Developer Advocate** with **12+ years in IT**, specializing in **GCP, Azure, AWS, Kubernetes, Terraform, and CI/CD**. Passionate about optimizing deployment pipelines, system performance, and implementing best DevOps practices. Proven track record in delivering customer-centric solutions, managing product roadmaps, and building developer tools. Skilled in Agile methodologies, cross-functional collaboration, and fostering developer communities. A recognized **Docker Captain** and **AWS Community Builder, Google Developer Expert** having delivered 500+ sessions across 20+ countries.

EXPERIENCE

DevOps Team Lead | BuildingMinds GmbH

June 2025 - Present, Berlin, Germany

- Led the DevOps and Platform Engineering function across infrastructure, delivery, and reliability, defining technical direction and mentoring engineers on cloud, DevOps, and AI-assisted workflows.
- Drove organisation-wide AI adoption by integrating **Claude and GitHub Copilot** into engineering processes, accelerating IaC development, automation, documentation, and incident resolution.
- Architected and managed Azure infrastructure for a microservices SaaS platform using **Terraform/Terragrunt and AKS**, supporting secure multi-environment (dev/staging/prod) deployments.
- Spearheaded migration from **Azure DevOps to GitHub Enterprise Cloud** for 100+ repositories and 20+ teams, implementing SAML SSO, Azure AD sync, and reusable GitHub Actions templates.
- Optimized Kubernetes autoscaling (HPA, VPA, Cluster Autoscaler), achieving **30–40% infrastructure cost reduction** across environments.
- Implemented DevSecOps and platform security practices including **PIM-based privileged access, zero-trust patterns, security scanning, and compliance controls**.

DevOps & Cloud Consultant | Havops Technologies LLP

August 2022 - November 2024, Remote

- Architected robust cloud infrastructure frameworks on AWS and GCP, focusing on enhanced scalability, security, and sustainable cost management.
- Deployed and managed workloads using Docker, Podman, and Kubernetes (EKS, GKE, OpenShift), ensuring high availability and performance.
- Implemented GitLab CI/CD, GitHub Actions, and ArgoCD for automated testing, deployment, and version control, streamlining software delivery.
- Utilized Grafana, Prometheus, and Docker Scout for real-time monitoring, vulnerability scanning, and security enforcement across cloud-native applications.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible, reducing manual interventions and errors..

Open-Source Community Manager | Zextras

March 2022 - August 2022, Remote

ZeXtras Suite is a modular extension for Zimbra Collaboration.

- Developed and executed global community growth strategies, increasing active users to 1.5K and total members to 5K.
- Translated community feedback into actionable tasks, collaborating with product and engineering teams.
- Organized and led developer events, webinars, and meetups to foster engagement and product feedback loops.
- Developed comprehensive training materials for Carbonio, including instructional videos, a support forum, internal and external wiki pages, and hosted detailed documentation on GitHub.

Technical Product Manager & Fractional CTO | BookRyde by SoftPixel.CO via Internauts Infotech LLP

July 2019 - January 2022, Thailand

BookRyde was a ride-booking product developed by SoftPixel.CO, with resources managed by the India-based consulting firm Internauts Infotech LLP.

- Drove product life cycle management from inception to successful launch, boosting user engagement and market penetration by aligning technical development with strategic business objectives.
- Architected and managed product delivery on Google Cloud and AWS, ensuring scalability, security, and cost optimization.
- Managed a cross-functional team of developers, customer support, and technical support, driving product roadmaps, feature prioritization, and release cycles.
- Established CI/CD pipelines, automated deployments, and cloud-native best practices, leveraging Docker, Kubernetes, Terraform, and GitOps tools.
- Oversaw customer feedback loops and support strategies, refining product features and service delivery to enhance user experience.
- Provided cloud strategy, architecture consulting, and migrations, ensuring seamless integration for enterprise clients.
- Spearheaded MVP lifecycle planning and execution, achieving 25% faster release cycles through iterative user feedback.

Senior Technical Support Engineer | Zimbra

April 2018 - July 2019, Pune, India

- Administered and optimized Linux and Zimbra-based email infrastructure, ensuring high availability, security, and performance.
- Implemented and managed email security tools, including anti-malware, anti-spam, and data leakage prevention solutions.
- Led troubleshooting and root cause analysis of complex email and server-related incidents, ensuring timely resolution and minimal downtime.

- Collaborated with cross-functional teams, vendors, and stakeholders to enhance system reliability and security.
- Provided mentorship and technical guidance to L1 & L2 engineers, improving team capabilities and knowledge sharing..

Senior Technical Consultant | Zypher

October 2016 - April 2018, Ahmedabad, India

- Collaborated with clients and project teams to plan and execute project deliverables ensuring adherence to project scope and timelines to meet client objectives.
- Participated in beta testing of software releases, contributing to enhanced product quality and user experience.
- Led cloud platform operations on Redhat, VMWare, OpenVZ, OVH, KVM including infrastructure setup, migration, and cost estimation..

Technical Consultant | The Design Shop

December 2013 - September 2016, Ahmedabad, India

- Configured servers with necessary packages and control panels using Red Hat, CentOS, and Cloud Linux, optimizing operating environments.
- Evaluated, monitored, and reviewed installations to minimize technical issues, providing immediate resolutions to teams and clients.
- Oversaw technical project phases and provided early intervention strategies to maintain project schedule integrity using collaboration tools.

Technical Support Engineer | Persys Web Technologies

November 2012 - November 2013, Nashik, India

- Manage, monitor, and troubleshoot Linux servers to ensure high availability, security, and performance.
- Handle user accounts, permissions, and security policies to maintain system integrity and compliance.
- Conduct system audits, apply patches, and implement security best practices to safeguard infrastructure..
- Enhanced ticket resolution efficiency by 20% over 6 months through the implementation of automated diagnostic tools and streamlined workflow procedures.

EDUCATION

Master of Computer Science | Savitribai Phule Pune University

Pune, India, 08/2013-07/2015

Bachelor of Computer Science | Savitribai Phule Pune University

Pune, India, 08/2009-06/2012

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional

Google Cloud Professional DevOps Engineer

Associate Cloud Engineer – Google Cloud

Microsoft Certified: Azure Administrator Associate

AWS Certified Solutions Architect – Associate

INVOLVEMENT

Google Developer Expert - Google Cloud | Google

February 2025 - Present

- Demonstrate deep expertise in Google technologies through technical content, speaking, and community engagement.
- Drive developer adoption by sharing knowledge, fostering community growth, and contributing to ecosystem impact.

Docker Captain | Docker

August 2024 - Present

- Conducted Docker educational sessions internationally, achieving a 75% increase in participant skill level based on pre-and post-session assessments.
- Recognized as a Docker Captain for technical expertise and contributions to the Docker community.
- Advocated Docker by organizing workshops and webinars, elevating community engagement and product awareness among developers.

AWS Community Builder – Containers | AWS

October 2021 - Present

- The AWS Community Builders program provides technical resources, mentorship, and networking opportunities to AWS enthusiasts and emerging thought leaders.
- It supports those passionate about sharing knowledge and connecting with the technical community, with a focus on various categories, including containers.

Reps Council Member | Mozilla

November 2022 - November 2023

- Joined a 9-member council to enhance the operations of the Mozilla Reps program through synchronized initiatives.
- The Council oversees the governance and finances of the program and acts as an advisory body within Mozilla.
- It takes strategic decisions regarding the program with input from the rest of the leadership body.

SKILLS

Programming Languages: Python, Bash, YAML

Speaking language: English (C1), Hindi (C1), Gujarati (C2), German - Learning (A1)

Collaboration & Leadership: Cross-functional Collaboration | Technical Mentorship | Agile & DevOps Culture

Collaboration: Ensuring alignment across Product, Marketing, Sales, and Engineering teams

Technical Expertise: Designing CI/CD pipelines, automating processes, and managing cloud-based (AWS, GCP) infrastructure

Cloud Platforms: GCP, AWS, Azure

DevOps Tools: GitLab CI/CD, Jenkins, Docker, Kubernetes, Terraform, Ansible

Monitoring Tools: Prometheus, Grafana, Zabbix

Stakeholder Management: Preparing reports and presentations for diverse audiences, including investors and partners

Public Speaking & Community Leadership: Delivered over 500 technical sessions in 20+ countries, focusing on Open Source, cloud, IAM, and DevOps best practices. Featured Speaker at Global conferences like Serverless Days Milan & Auckland, OWASP New Zealand Day 2019, AppSec USA & Israel.
