Organizer

Claude Ambassador

Yair Etziony

Organizer

Claude Ambassador

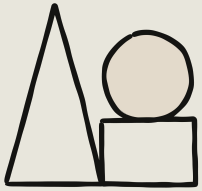

Thomas Kühnel

Venue partner

Co-CTO
Turbine Kreuzberg

Claude Code Berlin — a meetup for platform engineers, DevOps practitioners and the cloud native community.

Tonight

The problem every platform team is about to own

Skills, MCP servers and CLAUDE.md files multiply faster than anyone can review them

Shared naively, they turn into an ungoverned pile. Two production-tested answers:

- Talk 1: composable specialist agents, governed centrally
- Talk 2: layered, team-owned context, treated as code inside a large monorepo

Talk 1 · 18:45

Stop sharing skills: composable agents for your team

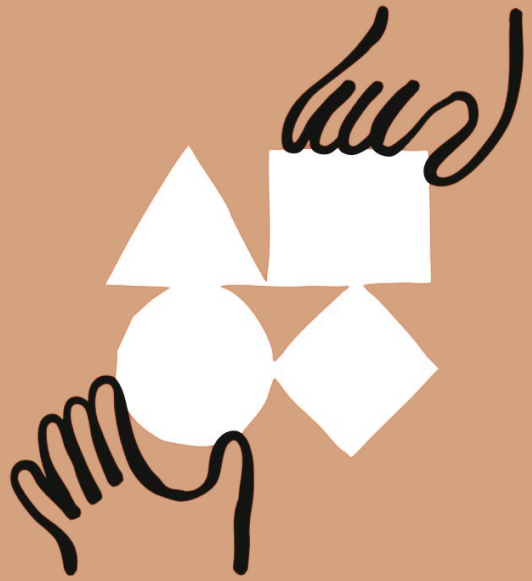

Dominik Schmidle

Product Lead for Platforms, Giant Swarm

Break

15 minutes — refill, stretch, say hi to someone new.

Talk 2 · 19:40

Designing an onion: domain-scoped AI context at monorepo scale

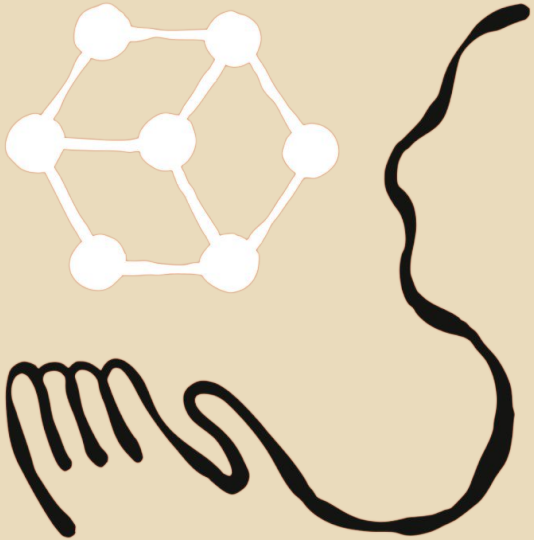

Na’aman Hirschfeld

Principal Systems Engineer, ServiceNow (Armis)

CTO of Xberg.io · creator of Litestar and polyfactory

Surprise

Not on the agenda. Revealed tonight.

Open floor

Thank you for coming. No hard end — the best part starts now.
