Hands-on · Hosted at GlassFlow

Claude Workshop

Berlin

In collaboration with Claude

Tonight's agenda

18:00	Doors, food, drinks & setup help desk
18:30	Welcome & Claude Community intro
18:45	Tares in 10 minutes — GlassFlow
18:55	Part 1 — Build an AI SRE
19:55	Short break
20:10	Part 2 — A software factory with Claude Code
21:00	Stretch goals, show and tell
21:20	Wrap-up & what's next
21:30	Networking

Welcome

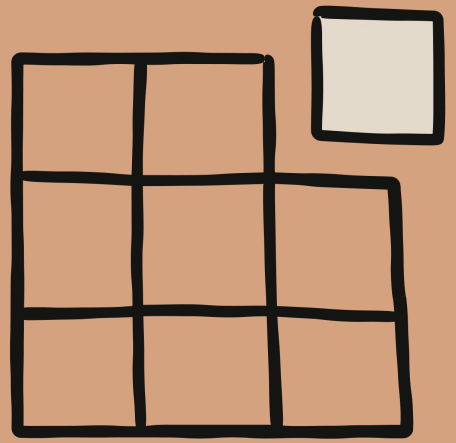

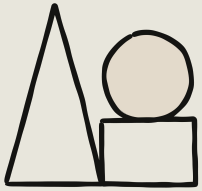

Photo notice

HEADS UP

Tonight’s event is being photographed

Photos may be shared on social media and the event page

- Don’t want to be in photos? Raise your hand now
- Our photographer will make sure not to capture you
- You can also tell a host or the photographer at any time tonight

Your hosts

Mehul Patel

Host

Claude Ambassador

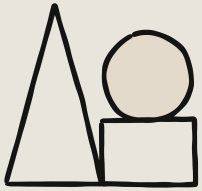

Markos Sfikas

Host

GlassFlow

Claude Code Berlin — a community event by local enthusiasts, for everyone who likes building with Claude.

Venue support

THANK YOU TO OUR VENUE PARTNER

GlassFlow

Hosting us tonight in Berlin · glassflow.ai

- Open-source Tares: the context layer that feeds agents correlated, real-time data
- Preview: Rius: trace agent decisions and tool calls

GlassFlow

Meet the GlassFlow team

Host · GlassFlow
Marketing Lead

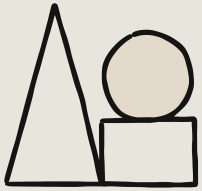

Ashish Bagri
GlassFlow
Co-founder, CTO

Kiran Nambiar
GlassFlow
Senior Backend Engineer

Find the GlassFlow team around the room tonight and say hi!

Before we build

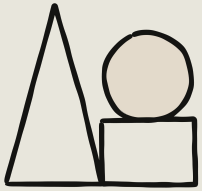

SETUP CHECK · HELP DESK OPEN UNTIL 18:30

Is your laptop ready?

Shared Wi-Fi for 65 people — please don't start big downloads now

- Docker running
- Python 3.11+ with uv or pipx
- Claude Code installed and logged in
- Anthropic API credits — provided by the workshop
- Stuck? Raise a hand, ask your question in the shared Slack channel and the help desk will come to you

API credits

$50 PER ATTENDEE · API ONLY, NOT CLAUDE.AI

Claim your API credits

Scan the QR code and submit your Org ID

- Find your Org ID at console.anthropic.com (Settings → Organization)
- Submit the Org ID — not your Claude.ai UUID, which will be rejected
- One claim per person, from one profile — repeat submissions get blocked
- Credits land within a couple of minutes

Scan to claim

INTRO · 18:45 · 10 MIN

Tares in 10 minutes

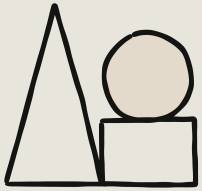

Ashish Bagri

GlassFlow

The open-source context layer for agents

Workshop guide

STEPS, GUIDES & DOWNLOADS FOR TONIGHT

Follow the guide

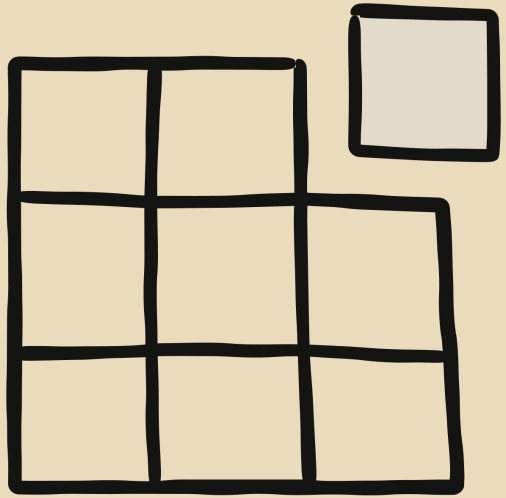

workshop-berlin.glassflow.ai

- Step-by-step guides for Part 1 (AI SRE) and Part 2 (software factory)
- Local: Docker + your own API key (Use from credits) · Cloud: free Tares workspace, no key needed
- Downloads: tares-demo.zip, factory starter repo, click-counter spec
- Docker or Wi-Fi giving you trouble? Switch to the cloud track

Scan for the guide
workshop-berlin.glassflow.ai

PART 1 · 18:55 · ~60 MIN

Build an AI SRE

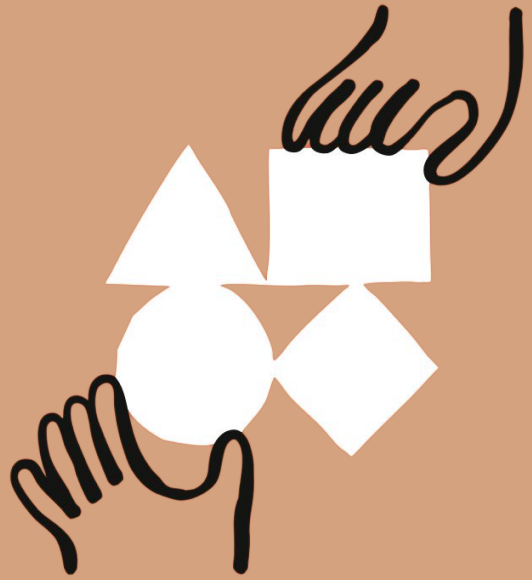

Hands-on

Scaffold an incident agent and connect it to Tares. Break a service, let the agent find the root cause and write it to the timeline. Bonus: MCP.

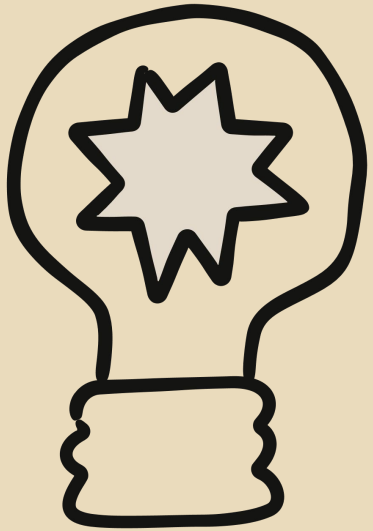

Break

15 minutes — refill and stretch before Part 2.

PART 2 · 20:10 · ~35 MIN

Set up a software factory with Claude Code & Tares

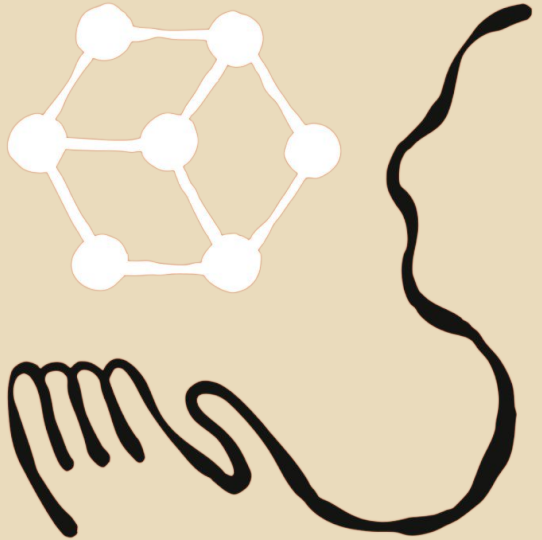

Hands-on

A challenger model critiques plans and reviews commits.
Blocking findings send Claude back to fix them.
Tares records the session and proposes what to remember.

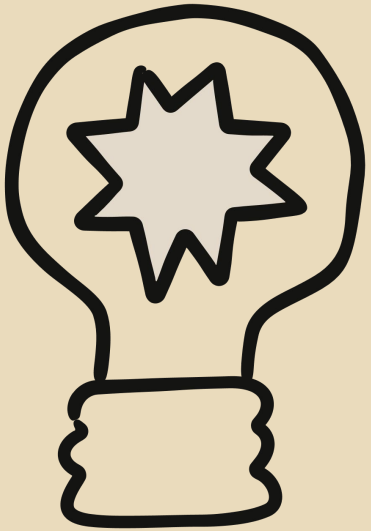

Keep building

Stretch goals, pair up, help desk still open.

Tell us how it went

Scan for feedback
workshop-berlin.glassflow.ai/vote

Scan the QR code

Did you like today's workshop? Want a follow-up session?
And what you run with AI today?

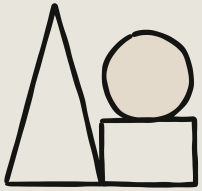

Share your feedback so we can keep improving the next workshops

Show and tell

2 minutes — show us what your agent found.

What's next

NEXT EDITION · SESSION 02

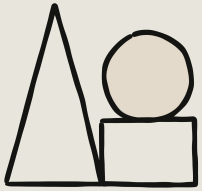

Claude Code Meetup Berlin

Berlin · venue on registration · hosts Yair Etziony & Mehul Patel

- Stop Sharing Skills: Composable Agents for Your Team — Dominik Schmidle, Giant Swarm
- Designing an Onion: Domain-Scoped AI Context at Monorepo Scale — Na'aman Hirschfeld, ServiceNow (Armis)
- For platform engineers, DevOps & the cloud native community
